Available for Technical or Management Position
Africa, Caribbean, China, USA Venues
Short Term or Part Time

CURRENT ACTIVITIES

MANAGING DIRECTOR: Trust Management Services *1993 - Present*
Founded in 1993, a pure trust provides clients a variety of services from simple informational resources to specialized services such as fiduciary, asset management, product development, and international ventures.

EXECUTIVE DIRECTOR: African Restoration *2007 - Present*
Initial project is to establish a sustainable, low cost, effective herbal cure for Malaria in Eastern Africa.

TECHNICAL DIVERSITY

Helmet Mounted Designator
Consultant to Oak Ridge Tool & Engineering Corp. to design, prepare patent and submit proposal for a system linking pilot eye moments to the weapon systems of the Comanche Helicopter.

Electronic Interface Device
Valley Industries was interested in developing a new technology to interface the Johnson Control's carrier wave programmer with load programmers, in order to retrofit energy management systems. Unaware that millions had been spent in attempts to develop such technology, the prototype interface unit was designed, built and quality tested for less than \$5,000 in 14 days time.

QA for Moon Mission
The moon mission vehicle, Apollo/Saturn, consisted of 6 million parts. With 99.9% reliability, there would have been a total of 6,000 failures on a mission. As a Senior Technical Specialist for IBM, developed the most advance quality assurance testing program in existence - researching, writing, & supervising advanced mechanical, electrical, electronic, chemical and metallurgical verification procedures for added reliability.

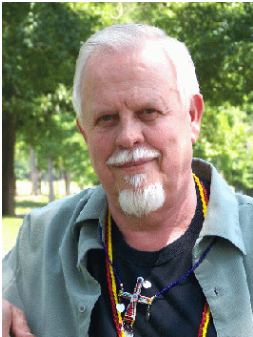

Distressed Renovation Revived
When a million dollar renovation of Acorn Hotels LLC was abandoned by a general contractor, TMS took over the project and finished it on schedule and within budget with only minor changes. Later, added income of the facility by incorporating an extended stay and wrote a proposal to convert the senior living facility.

Nuclear Equipment
Designed and operated test equipment for advanced nuclear research at Oak Ridge National Laboratories.
